

Freshwater Action Network

WATER AND CLIMATE CHANGE ADAPTATION

Perspective from Southern civil society

Freshwater Action Network
www.freshwateraction.net

- 
- A major network of civil society organisations implementing and influencing water and sanitation policy and practice.
 - Our members, from around the world, are respected for their unique skill, experience and perspective.
 - Our strategy is shaped by a consortium of CSO networks in Latin America, Africa and South Asia.
 - Improving water governance by strengthening the role of Southern civil society in decision-making

Challenges facing poor and marginalised communities

Freshwater Action Network

Building upon local adaptation techniques

We need to strengthen local adaptive capacity by supporting localised water resources approaches and looking at options of how to replicate them to scale

FANSA'S plans to deepen understanding of Climate Change

Knowledge-sharing
and training in India,
Bangladesh,
Pakistan and Nepal

Freshwater Action Network
South Asia

Key priority areas to consider

- BROAD STAKEHOLDER ENGAGEMENT
- DISSEMINATION AND SCALING UP OF POSITIVE EXPERIENCES
- ENHANCE SHARING OF BEST PRACTICE FROM SECTOR-BASED AND COMMUNITY-BASED ADAPTATION

- 
- DATA COLLECTION, MONITORING AND ACCESS TO INFORMATION
 - WATER BUDGETING - CONSERVATION TECHNIQUES
 - ADDRESSING WATER CONFLICTS
 - RECOGNITION OF THE RIGHT TO WATER
