

# Berau REDD Pilot Program

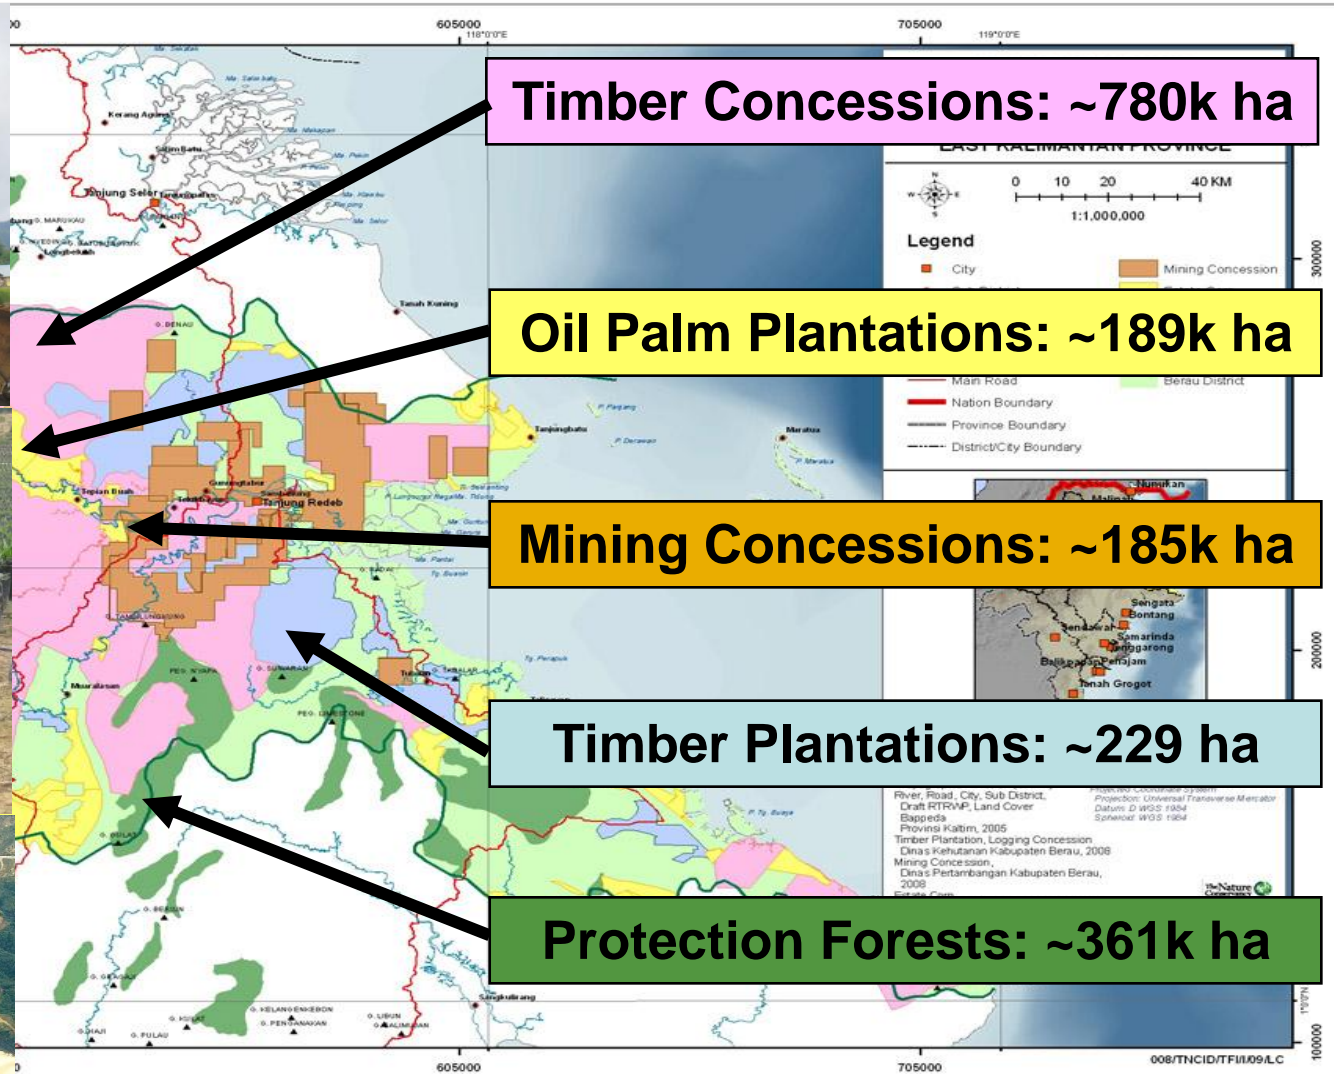

# Overview

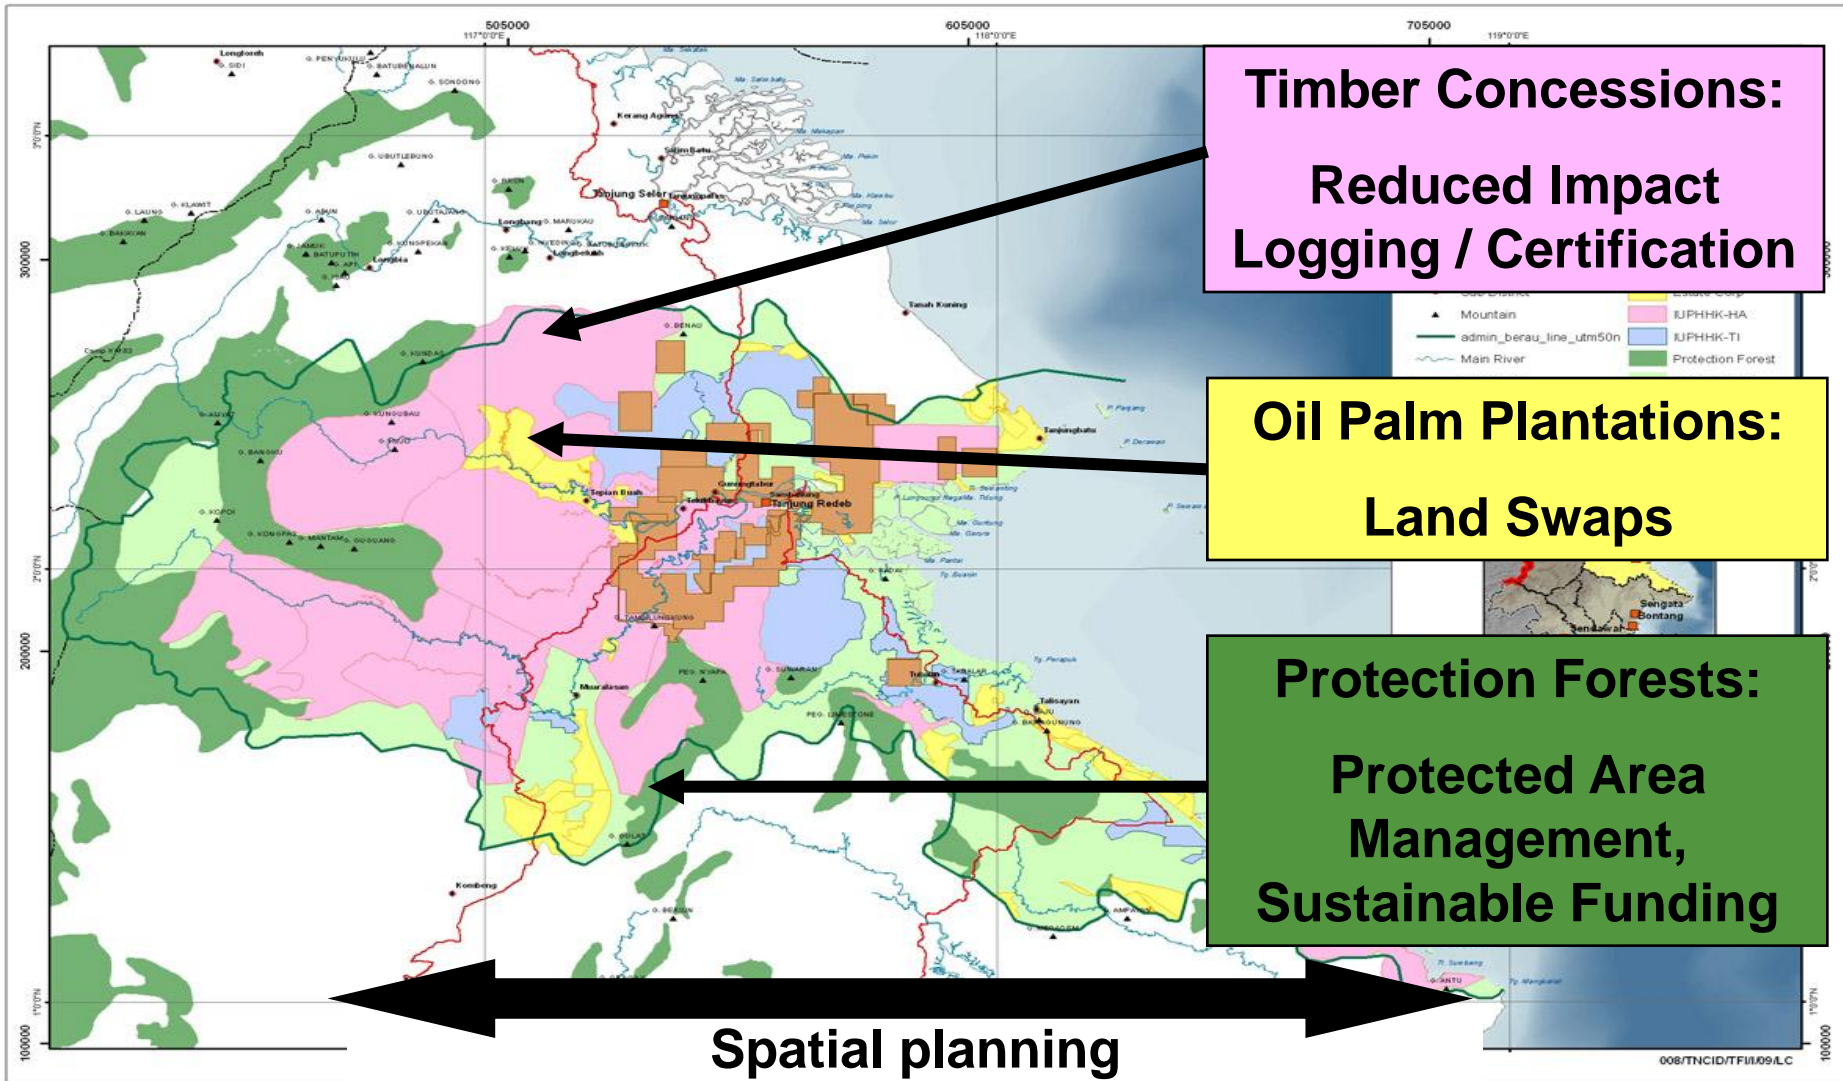

- 2.2 MM hectares
- >7 MM tons CO<sub>2</sub> in 5 years
- Benefits for key stakeholders
- Model for REDD and sustainable development
- Pathway to national program

# Land use in Berau

# REDD Strategies

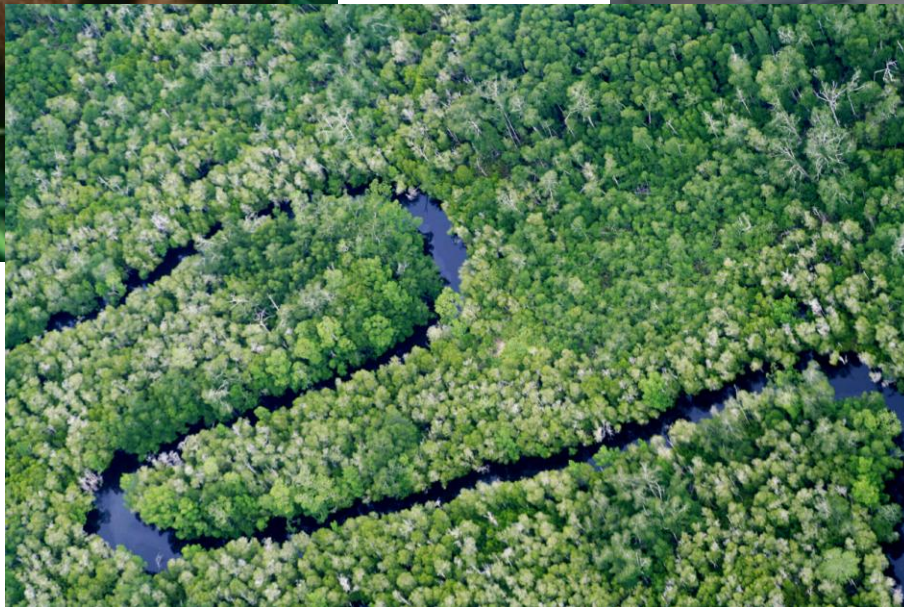

# Strengths

---

- District-wide program
- Comprehensive scope: REDD+
- Multi-stakeholder involvement
- Portfolio of funding
- Science-based, measurable

 ***Illustrates many elements of the “global mechanism” proposal***

# Expected Results

# Berau REDD Phase I Structure

Draft

# Berau as a microcosm of Indonesia

- Need for a sustainable development pathway
- Data and processes needed to clarify land use decision-making
- Financial, legal, institutional arrangements needed for REDD
- Market-based REDD funding unlikely in near-term

 ***Tackling challenges at district scale provides experience base critical to reaching national scale***
