The Ecosystems Climate Alliance (ECA) is an alliance of environmental and social NGOs committed to keeping natural terrestrial ecosystems intact and their carbon out of the atmosphere, in an equitable and transparent way that respects the rights of indigenous peoples and local communities. ECA recognises that avoiding emissions of terrestrial carbon stored in the soils and biomass of forests, peatlands and wetlands represents the largest potential single opportunity for cost-effective greenhouse gas mitigation. ECA advocates climate, forest and land use policies to give strong, equitable, transparent and positive incentives free of perversities for avoiding the degradation of terrestrial carbon stores and for rehabilitating degraded land, supported by effective forest governance, robust monitoring and demand-side policies to ensure meaningful outcomes.
