# Mission of JIAG

Established in March 2008 at the CarbonExpo by JI project developers. The members realized a lack of awareness of the **potential and specifics** of JI with many stakeholders.

JIAG has been established to promote JI as an effective mechanism for reducing greenhouse gas emissions in **capped environments**. JIAG aims to contribute to further improving the way JI works in the first commitment period of the Kyoto Protocol and to ensure the **continuation** of a project-based mechanism in any post-2012 agreement
